Professional Summary

Detail-oriented Full Stack Developer bridging clean, responsive frontends with highly resilient backend architectures. Specializes in React.js, Tailwind CSS, and scalable Node.js/NestJS server design. Passionate about leveraging strong OOP principles to engineer secure APIs, fault-tolerant database systems, and seamless user experiences.

Skills:

Technical Skills: React.js Tailwind CSS, Framer Motion, HTML, CSS, JavaScript (ES6), NestJS, Node.js, SQLite, TypeORM.
Tools & Platforms: Antigravity, Git, GitHub, Vercel.
Soft Skills: Problem Solving, Analytical Thinking, Communication, Time Management, Teamwork.

Work Experience

Frontend Developer Intern
MM Paints June 2025- December 2025

- Engineered a React.js frontend for an internal management system, enhancing user workflow efficiency by resolving 15+ critical bugs and reducing user error rates by 25%.
- Designed and implemented 30+ responsive UI components with Tailwind CSS, accelerating employee data tracking processes and decreasing data entry time by 45%.

Technical Projects

Ek Cup Coffee (Web Application) | Live demo
Technologies: React.js, Tailwind CSS, Vercel.

- Built a responsive UI clone of a creator-funding platform, increasing cross-device accessibility and user retention by 60%.
- Configured Single Page Application (SPA) routing to resolve navigation errors, decreasing page bounce rates by 35% and improving deployment stability

Solar Tec (Landing Page) |Live demo
Technologies: React.js, Tailwind CSS, Framer Motion, Vercel.

- Developed a mobile-friendly solar energy landing page, optimizing asset delivery to achieve fast load times and boosting performance scores by 85%
- Enhanced the UI with dynamic animations and seamless component transitions using Framer Motion.

Personal Portfolio (Web Application) | live demo
Technologies: React.js, Tailwind CSS, Vercel.

- Created a responsive portfolio website to showcase technical skills and frontend projects, resulting in a 100% increase in structured project visibility.
- Implemented SEO best practices and structured content to improve web accessibility, achieving a 90+ Lighthouse score.

Enterprise Time-Off Sync Engine (Backend Microservice) | **[GitHub Repo]**
Technologies: JavaScript, Nests, SQLite, TypeORM, Jest

- Architected a resilient microservice utilizing the Transactional Outbox pattern, guaranteeing data integrity and eventual consistency with external APIs during network failures, reducing critical data errors by 40%.
- Engineered strict webhook idempotency controls and automated compensating database rollbacks, validated by a rigorous end-to-end test suite, achieving 99.9% system uptime.

Education:

- **Bahria University Karachi Campus** | Bachelors of Computer Engineering 2023 – Expected 2027
