LinkedIn: Abdul Wasay Ali Khan | Portfolio: https://my-personal-portfolio-orcin.vercel.app/

Professional Summary

Detail-oriented Full Stack Developer bridging clean, responsive frontends with highly resilient backend architectures. Specializes in React.js, Tailwind CSS, and scalable Node.js/NestJS server design. Passionate about leveraging strong OOP principles to engineer secure APIs, fault-tolerant database systems, and seamless user experiences.

Skills:

Technical Skills: React.js Tailwind CSS, Framer Motion, HTML, CSS, JavaScript (ES6), NestJS, Node.js, SQLite, TypeORM.
Tools & Platforms: Antigravity, Git, GitHub, Vercel.
Soft Skills: Problem Solving, Analytical Thinking, Communication, Time Management, Teamwork.

Work Experience

Frontend Developer Intern
MM Paints June 2025- December 2025

- Built the frontend for an internal management system using React.js and Tailwind CSS.
- Designed and implemented responsive UI components to streamline employee data tracking.

Technical Projects

Ek Cup Coffee (Web Application) | Live demo
Technologies: React.js, Tailwind CSS, Vercel.

- Built a responsive UI clone of a creator-funding platform to deliver a modern, accessible user experience.
- Configured Single Page Application (SPA) routing to resolve navigation errors and deployed the site.

Solar Tec (Landing Page) |Live demo
Technologies: React.js, Tailwind CSS, Framer Motion, Vercel.

- Developed a mobile-friendly solar energy landing page focused on a clean layout and fast load times.
- Enhanced the UI with dynamic animations and seamless component transitions using Framer Motion.

Personal Portfolio (Web Application) | live demo
Technologies: React.js, Tailwind CSS, Vercel.

- Created a responsive portfolio website to effectively showcase my technical skills and frontend projects.
- Implemented SEO best practices and structured content to improve overall web visibility and accessibility.

Enterprise Time-Off Sync Engine (Backend Microservice) | **[GitHub Repo]**
Technologies: JavaScript, Nests, SQLite, TypeORM, Jest

- Architected a highly resilient microservice implementing the Transactional Outbox pattern to guarantee data integrity and eventual consistency with external APIs during network failures.
- Engineered strict webhook idempotency controls and automated compensating database rollbacks, validated by a rigorous end-to-end test suite.

Education:

Bahria University Karachi Campus 2023 – Expected 2027

- Bachelors of Computer Engineering
